## Benefits of Thin Veneer Stone:

- Lightweight
- Durability
- Easy Installation
- Economical
- Variety
- Versatile

# FLAGSTONE

Flagstone is a natural stone that is typically sold in an irregular, inconsistent flat shape and no two stones seem to be alike. However, flagstone can also be cut into tile stones. It's thickness usually ranges from 1 to 2 inches. It is durable and can be used both indoors and outdoors. Typically used for walkways and patios. It's greatest advantage being able to create an enhanced one-of-a-kind look.

# CHOPPED STONE

Our Chopped Stone selection is made up of various natural stones which can be used for building both residential and commercial. It is a great source for building outdoor and indoor living structure such as stone fire pit grills, serving areas, fire places curbing and flowerbed edging. Since these natural stone blocks are available in a variety of shapes and sizes, you have the flexibility to create the effect you want.
